## SKILLS

---

- **Languages:** Python, Java, C++
- **Frameworks:** HTML, CSS, Data Structures and Algorithms (DSA)
- **Tools/Platforms:** Google Colab, Linux
- **Soft Skills:** Strategic Planning, Dedication, Positivity

## PROJECTS

---

### Scientific Calculator

Feb 2025

- Program of Scientific Calculator is written using Python
  - Complex calculations of integers and float values can be performed using assignment operators and trigonometric functions
  - Front end design of calculator is developed using HTML and CSS
- Tech:** Python, HTML, CSS

### SENTIMENT ANALYSIS ON US AIRLINE REVIEWS

Sep 2024 - Nov 2024

- Developed an **LSTM-based deep learning model** to classify airline tweet sentiments as positive or negative
  - **Preprocessed text data** using tokenization, word embeddings, and sequence padding to improve model accuracy
  - Implemented **binary sentiment classification** using **TensorFlow, Keras, and NLP techniques** for real-world applications
  - Optimized model performance with **dropout layers, hyperparameter tuning, and early stopping**
  - Built a **real-time sentiment prediction system**, enabling **automated sentiment tracking** for airline companies
- Tech Stack:** Python, TensorFlow, Keras, Pandas, Matplotlib, Deep Learning, Sentiment Analysis, Sequence Modeling

## TRAINING

---

### Board Infinity | Data Science

Jul 2024 - Aug 2024

- Developed IMDB movie analysis using Advanced Python and SQL
  - Implemented Data Visualization, Tableau Visualization for Chart, Table, Graph, Geospatial, Infographic, Gantt Chart, Heat Map, Pie Chart, Tree Map, and Advanced SQL Techniques like Window functions, CTEs, and Recursive Queries to perform complex data analysis and manipulation with greater precision and efficiency
  - Use of Advanced Excel for effective data collection and visualization in form of graphs
- Tech:** Advance Python, SQL, Tableau, Excel

## CERTIFICATES/CERTIFICATIONS

---

- |                                                        |          |
|--------------------------------------------------------|----------|
| • Data Science certificate by board infinity           | Aug 2024 |
| • Generative AI with Large Language Models by Coursera | May 2024 |
| • Prompt Engineering for ChatGPT by Coursera           | Feb 2024 |

## EDUCATION

---

- |                                                                                                          |                                                          |
|----------------------------------------------------------------------------------------------------------|----------------------------------------------------------|
| • <b>Lovely Professional University</b><br>Bachelors of Technology – Computer Science; <b>CGPA: 5.13</b> | Phagwara, Punjab<br>Since August 2022                    |
| • <b>Resonance</b><br>12th; <b>Percentage: 74%</b>                                                       | Visakhapatnam, Andhra Pradesh<br>April 2021 - March 2022 |
| • <b>Sri Prakash Vidyanketan</b><br>10th; <b>Percentage: 83.2%</b>                                       | Pendurthi, Andhra Pradesh<br>April 2019 - March 2020     |
